

# Tuition Cap

State aid intended to offset capped tuition

Legislative action is needed to continue phasing in this policy

STATE CAPITOL

## Key Facts:

Limits magnet and Vo-Ag tuition rates

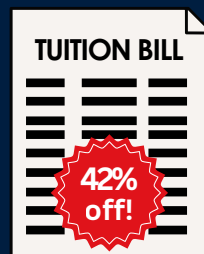

Results in nearly \$40 million in annual savings for local districts

Magnet and Vo-Ag operators can only bill 58% of their FY24 tuition amounts — resulting in tuition savings for school districts

Magnet School or Vo-Ag Program

tuition

Local or Regional School District

## What is the Tuition Cap?

During the 2023 legislative session, as part of the biennial state budget for fiscal years 2024 and 2025, the General Assembly passed a cap on the per-student tuition amounts magnet school and vocational-agricultural (Vo-Ag) program operators may charge local or regional school districts that send students to attend these school choice options. In 2024, the legislature extended the cap for all future fiscal years.

Beginning in FY 2025, the per-student tuition amount an operator may charge is capped at 58% of the per-student tuition amount the operator charged in FY 2024. As a result of this cap, sending districts paying tuition will experience savings due to lower tuition costs.

### How the Cap Works
