

## Ruby - Feature #16018

### Add a way to deprecate methods

07/24/2019 03:04 PM - vo.x (Vit Ondruch)

<b>Target version:</b>		
<b>Description</b> Since <a href="#">#11398</a> , We have Module#deprecate_constant available. But I wonder, why we don't have a way to deprecate methods? There is already Gem::Deprecate <a href="#">1</a> , so may be this could be extracted and made more generic?  This might be useful on several places in Ruby code:  <pre>\$ find . -name \*.rb -type f -exec grep -r '[_]warn.*deprecate' {} \;   wc -l</pre> 66

#### History

##### #1 - 07/24/2019 03:10 PM - jeremyevans0 (Jeremy Evans)

- Tracker changed from Bug to Feature
- ruby -v deleted (ruby 2.6.3p62 (2019-04-16 revision 67580) [i386-linux])
- Backport deleted (2.5: UNKNOWN, 2.6: UNKNOWN)

##### #2 - 09/02/2019 06:24 AM - mame (Yusuke Endoh)

At the developers' meeting, no one was against this feature. It would be great if we can print a warning per a pair of callsite and callee (to suppress duplicated redundant warnings), but the implementation is not trivial (exploiting method call cache)?
