

Ruby - Bug #20183

`erb/escape.so` cannot be loaded when `--with-static-linked-ext`

Description		
Since cgi/escape.c and erb/escape.c are both initialized by Init_escape() functions, both call the same function in extinit.c.

Alias init functions

```
The extension library has each initialization function named "Init_" +
basename. If multiple extensions have the same base name (such as
cgi/escape and erb/escape), the same function will be registered for
both names.

To fix this conflict, rename the initialization functions under sub
directories using using parent names, when statically linking.
