Ruby - Bug #3832

Etc.sysconfig contains "$(DESTDIR)" when ./configure is called with --sysconfdir=

09/15/2010 10:03 PM - Anonymous

Status:	Closed		
Priority:	Normal

Target version:	1.9.2		
ruby -v:	ruby 1.9.2p0	**Backport:**	

Description

=begin
When the Ruby source files are configured for compilation with ./configure and the --sysconfdir= parameter is specified, the "ext/etc/extconf.h" file is generated with a SYSCONFDIR variable that contains "$(DESTDIR)" literally, not expanded. For example:

$ ./configure --prefix=/usr --sysconfdir=/etc
...
$ make
...
$ grep SYSCONFDIR ext/etc/extconf.h
#define SYSCONFDIR "$(DESTDIR)/etc"

This variable was introduced in r27667 and seems only used in "lib/rubygems/config_file.rb". Why not use Config::CONFIG['sysconfdir'] there (rbconfig is already required by rubygems)?

Note: this was verified on Linux RHEL 5 with ruby-1.9.2-p0.tar.bz2.

It's determined at runtime on Windows.

This issue was solved with changeset r29268.
Eric-Olivier, thank you for reporting this issue.
Your contribution to Ruby is greatly appreciated.
May Ruby be with you.
